

Original areforum.org ftp Alternate Vignette installation instructions:

*****HOW TO USE THESE FILES*****

**GETTING STARTED:

1. Open the C:\NCARBPP folder.
2. Make a new folder in the NCARBPP folder and call it "Alt Plans" (or whatever).
3. Download the files from the FTP into that folder.

**MAKING THE SWITCH:

4. Return to the main C:\NCARBPP folder. There you will see a files named C#TUT#W1.DWG. These are the various practice plans. See below for the list to know which file corresponds to which vignette.
5. Rename the file you want to switch to C#TUT#W1.31.DWG. Make a copy of it as well and leave the name as "Copy of C#TUT#W1.31.DWG". Place that copy in your Alt Plans folder
6. *Copy* the replacement alternative files into the C:\NCARBPP folder. (The C# will be the same.)
7. Remove the extra information from the file name so that it is now C#TUT#W1.DWG.
8. Open your practice program and select the tutorial.
9. A warning box will pop up telling you that your dwg file has changed. Click OK and you are on your way.

**USING ANOTHER ONE:

10. If you'd like to practice with multiple alt plans, you will just need to delete the C#TUT#W1.DWG in the folder that you just used, once again *copy* a new file into the folder, then rename it.
11. If you ever want to go back to the original, just use the rename C#TUT#W1.31.DWG drawing, making sure to name it back if you start the process over.
